

ELEV8 — Landing Page, Final Copy

Everything below is final, on-brand copy, ready to build. Art direction is noted briefly in italics; the rest is exactly what appears on the page.

PRELOAD

Cream background. A soft round plum hole opens center-screen. El's ears rise through it, then her eyes. She holds a beat, then steps back down as the hole closes into the "8" of the logotype, top-left. 1.6 seconds. No copy.

01 — HERO

Full viewport. Cream background. A small hole open at the lower-right, El peeking up, ears up, watching the headline arrive.

HEALTH CENTRIC → ELEV8

Know your baseline.

Elevate everything.

Two million genomes, so we can be precise about one.

[[Start reading ↓](#)]

02 — THE HONEST PART

Cream. This is the section that earns the rest of the page.

WHERE WE START

You already said it.

Health Centric's current homepage carries one line above everything else: "*Elevate your life.*"

It's the best thing on the site — and it's fighting for air against four database statistics and a panel called *Endocrinology & Metabolism*.

Elev8 isn't a new idea. It's the idea you already had, given a name, a face, and somewhere to stand.

THE BRAND PROBLEM

Exclusive, or inclusive. Pick one.

Exclusive gets you margin, aspiration, a reason to charge what precision is worth. It also gets you a brand nobody's mother would click.

Inclusive gets you scale, warmth, a market of a billion people. It also gets you a commodity nobody pays a premium for.

We don't pick.

Your baseline is yours alone. The wish to rise is everyone's.

Elev8 is exclusive because it's $n=1$ — nobody else on earth has your data, so nobody else can be sold your plan. It's inclusive because everyone has a baseline, and every baseline is a legitimate place to start. Precision *is* the luxury. Nobody's excluded from being themselves.

03 — MEET EL

Cream. A small hole opens at the edge of this section as it scrolls into view, and El pops up through it.

THE CHARACTER

Meet El.

Look at the "8" in Elev8 and you'll find it: one unbroken line, looped twice. It's the same shape as your nervous system in miniature — the line every signal in your body travels along.

El was drawn from that line.

When you need her, the loop unwinds, opens a small hole in the page, and she rises up through it — ears first, then those calm, curious eyes. She's not arriving from somewhere else. She was already there.

She doesn't do the work for you, and she won't lecture you either. She just makes sure that whatever you're looking at — a heart panel, a meal plan, a milestone you just hit — you don't have to look at it alone.

El, in every state she needs to be — live demo: Neutral · Waiting · Thinking · Celebrating

Why a bunny	Why a hole
She has to feel safe next to serious content. Calm, never performative.	She's literally the logo. The hole she rises from and the loop she's drawn from are the same "8" in the wordmark.

El never changes shape to represent a topic — she stays herself, always. The six panels below carry their own identity instead.

04 — WHAT ARE YOU TRYING TO ELEVATE?

Cream. Six tiles, each with its own small abstract icon in its vertical colour — a swoosh, a spiral, a circle, a leaf, a squiggle, a droplet. Same register as a considered meditation-app icon set: simple, colourful, never literal.

THE SAME SIX PANELS. A DIFFERENT DOOR.

What are you trying to elevate?

MOVE — swoosh	Train the body you actually have.
LONG — circle	Play the long game with real numbers.
CLEAR — spiral	Sleep, stress, and the head between them.

FUEL — leaf blob	Find out what your food is actually doing.
KNOW — dotted squiggle	Get ahead of what runs in the family.
LOOK — droplet	Skin and hair, decided by chemistry.

Icon captions, for hover states or the standalone system slide — a second, shorter layer under the panel copy above:

Icon	One-liner
Swoosh (coral)	Every rep, every stride — one upward line.
Spiral (indigo)	The line stress takes, before you catch it.
Circle (amber)	A whole, steady state, held over time.
Leaf blob (jade)	Shaped by what you actually eat.
Dotted squiggle (orchid)	Every point, connected — your family's pattern.
Droplet (teal)	One clear read on skin and hair.

Third layer — tap-to-expand only, never shown by default. Six paragraphs of icon justification would slow the page down right where it needs to move fastest. Held back for a curious visitor who taps an icon a second time, or for the standalone "why these shapes" slide in the pitch deck:

Icon	Why this shape
Swoosh (MOVE)	An upward stroke, mid-arc — the shape of a stride, a jump, a rep completed. Nothing about it is resting.
Spiral (CLEAR)	A spiral unwinds from a tight centre outward — the physical shape of a thought loosening its grip.
Circle (LONG)	A complete, unbroken form. No start, no end — nothing partial about it.

Icon	Why this shape
Leaf blob (FUEL)	The one organic shape in the set — grown, not drawn with a ruler.
Dotted squiggle (KNOW)	A trail of individual points forming one connected path — data markers, strung into a pattern.
Droplet (LOOK)	The simplest unit of something clear and concentrated. One drop, one clean answer.

[show me the clinical names]

05 — SAME SCIENCE, DIFFERENT SENTENCE

Cream. A slider wipes between two columns.

WE DIDN'T CHANGE WHAT YOU SELL. WE CHANGED WHAT IT SOUNDS LIKE.

Health Centric says	Elev8 says
"Endocrinology & Metabolism Panel — Rs. 25,000"	"Why your body treats food differently. Metabolism. From ₹25,000."
"Genes influencing MODY, T2D/T1D, Insulin sensitivity with exercise"	"Find out whether exercise actually moves your blood sugar — or whether you need a different lever."
"Gene variants influencing production of DHEA, Oxytocin, Melatonin, Cortisol"	"Four hormones decide how you sleep, stress and recover. Yours don't behave like anyone else's."
"2 Million — World's Most Advanced Genomic Bigdata"	"2 million genomes so we can be precise about one. Yours."
"ALWAYS BE HEALTH CENTRIC"	"Know your baseline. Elevate everything."

06 — THE SYSTEM

Cream. A working preview of the brand book itself.

THE KIT

A brand you can hand to anyone.

Colour. Lifted from the four-colour base-call scheme of a DNA sequencing chromatogram — warmed, deepened, made brand-safe. Kalava red carries every primary action. One saturated colour, one job.

Type. A display face confident enough to hold a 96px headline and warm enough to sit at 24px next to a diagnosis. Sport sits beside Cancer Panel on this site — the type has to survive both.

EI. Full construction rules, her four poses, and the mechanic that makes her more than decoration — she's literally drawn from the "8" in the logo. Plus a separate abstract icon system for the six verticals, so she never has to do double duty as a diagram.

Motion. One signature system: things draw in before they appear, EI leads every load and every empty state, and everything respects reduced motion by default.

Every rule exists so the tenth person to touch this brand makes the same decision as the first.

07 — WHAT YOU GET FROM US

Cream.

WHAT YOU GET FROM US

Six things. One team. One line of accountability.

Most brands buy strategy from one place, design from another, code from a third, and social from a fourth — and spend a year translating between them. We do all six, so nothing gets lost in the handover.

01 · BRAND — Positioning, naming, the EI character with a full pose sheet, colour and type system, tone of voice, and every collateral you'll actually use: kit packaging, lab report template,

business cards, pitch decks, merch. Delivered as a brand book any agency or freelancer can execute from without calling us.

02 · WEB DESIGN & DEVELOPMENT — Every template, home to checkout, built on your existing stack so nothing's thrown away. CMS your team can publish from. Green Core Web Vitals on mobile. Accessibility to WCAG AA — non-negotiable in health.

03 · APP DEVELOPMENT — iOS and Android. Onboarding that doesn't lose people at the kit stage. Reports that translate findings into a plan. Roadmapped to EI as an in-app companion.

04 · BACKEND & INFRASTRUCTURE — APIs, auth, sample lifecycle, report generation, payments, admin dashboard. Built for genomic data — encryption, consent management, audit logs, India data residency, a defensible DPDP position. Documented, so you're never hostage to a vendor. Including us.

05 · SOCIAL — INSTAGRAM, YOUTUBE, LINKEDIN — Instagram is the brand's face. YouTube is the credibility engine that converts a ₹25,000 decision. LinkedIn is the B2B pipeline into hospitals, corporates, and sports academies. Strategy, content, motion, community management, and reporting against named KPIs — all three, one voice.

06 · CONTENT & ALWAYS-ON (*recommended add-on*) — The editorial engine behind everything: pillar strategy, SEO, the Knowledge Centre rebuilt as a real asset, and AI-search optimisation, so Elev8 gets cited when someone asks a chatbot about genetic testing in India. Almost nobody in Indian healthcare is doing this yet.

08 — HOW WE'D RUN IT

Cream. Three phases.

Phase 1 · Identity Brand strategy, naming lock, EI design and pose sheet, full visual system, brand book, core collateral.

Phase 2 · Surfaces Website design and build, backend, CMS, B2B property, launch campaign, social system live.

Phase 3 · Product & Companion App design and build, report-translation layer, and EI as an in-app companion — the thing that reads your genome back to you in your own language and remembers what you asked last month.

Phase 4 · Parallel Marketing & Community Runs alongside Phases 1–3, not after. Instagram and LinkedIn content built in the brand's own voice from day one, so Elev8 has a warmed-up

audience waiting before the site or app ever ships. Content calendars, reels and carousel formats, founder-led LinkedIn posts, community management, and paid amplification testing — El appears here early, in her four poses, well before the full build is live.

Phase 5 · Content at Scale Where content stops being a build-up and becomes the engine. Exact scope gets locked once we're inside Phases 1–3 — what's working in Phase 4 tells us what's worth scaling, rather than guessing at it now.

Phase 3 is where a mascot stops being a logo and starts being a reason to renew a subscription. There's a two-year window to do this first in India.

09 — CLOSE

Cream. El fully emerged in the centre, hand raised in a thumbs-up. One button.

Chandra — everything above took a couple of days.

Give us the brand and we'll give you the rest.
